1. Using display and box-shadow property, create a accordion shape banner consisting of 4 sections inside. Each section will be extended smoothly whenever it's hovered not changing the whole width of the banner. When hovered, only hovered section will be extended as the source video. (Use the source files attached for the source images)

Good
Programming
Practices call
attention to
techniques that
will help you
produce programs
that are clearer,
more
understandable
and more
maintainable.

Error-Prevention
Tips contain
suggestions for
exposing bugs
and removing
them from your
programs; many
describe aspects
of programming
that prevent bugs
from getting into
programs in the
first place.

Common
Programming
Errors point out
the errors that
students tend to
make frequently.
These Common
Programming
Errors reduce the
likelihood that
you'll make the
same mistakes.

Software
Engineering
Observations
highlight
architectural and
design issues that
affect the
construction of
software systems,
especially largescale systems.

Create a menu for a website using CSS only. It will be responsive and for smaller than or equal to 760px. All the menu list will be a block element as below. If you click "Show Menu", the whole menu will be shown;

Show Menu
Home
About ↓
Courses ↓
News
Contact

Show Menu
Home
About ↓
Who We Are
What We Do
Courses ↓
